

CAITLIN WHITELEY

INGLESIDE, LANSDOWN ROAD, BATH, BA1 5SU

M: 07769 173361 | H: 01225 480936 | caitlin.whiteley@hotmail.co.uk | DOB: 19/09/1996

PROFILE

A logical, creative, hard-working and conscientious junior developer. Completed an intensive 12-week software development course, proficient in programming languages such as HTML, CSS and Typescript, used within the Angular framework. Loves the logical problem-solving aspects of coding, as well as the creative design encompassed within web development.

Looking for a junior developer role within a commutable distance from Bristol, to be able to pull everything learnt together, and to work in an inspiring environment.

Outside of work, sport is the other focus. As a member of a successful international level cheerleading team, the ability to work closely with others and commit to an intensive training schedule is as important as drive is within the office.

KEY SKILLS

- **HTML 5**
- **CSS 3**
- **JavaScript** (ES5)
- **TypeScript**
- **Angular 6**
- Python
- VBA
- Git
- Firebase
- Bootstrap
- jQuery
- LaTeX
- Problem solver
- Creative
- Team player
- Quick learner
- Committed
- Time management
- Good listening and communication skills

WORK EXPERIENCE

_NOLOGY.IO

Web development programme | October 2018 – January 2019

Nology is a 12 week, full time training course, teaching front end web development. The course focuses not just teaching us how to code from scratch, but how to write code to a very high standard. Some of the main skills I learnt include:

- Writing code effectively and to a high standard
- Practicing a mobile first approach in my code
- Cross browser testing
- Following SOLID principals
- Working using Firebase- authorisation and CRUD
- Using Git to work on group projects
- Writing and presenting a TED style talk

I worked directly with clients, and on a variety of personal projects. This included an app which assess your personal growth, for which I created the questionnaire, and a front end service. The service took the results from the questionnaire and used them to output relevant scores and averages. I also created an interactive CV, which I enjoyed designing as well as creating, resulting in me winning star coder.

HARE & HOUNDS

Front of house staff | September 2018 – October 2018

To bridge the gap between graduating and starting a career, I worked as a waitress at a local gastro pub. This reinforced my time management skills after 2 months travelling, as I was juggling work, sports, researching careers and applying for jobs.

Key achievements: time management, customer service, adaptability, team work.

EDWARD BILLINGTON & SONS LTD

Summer Internship | July – September 2017

I worked in a dynamic food factory (Bar Foods), that manufactures ready meals and sauces for high street restaurants. I mainly worked in the operations office, where I learnt to use Excel VBA. A significant part of

the job was writing code for the planning process, working to make the complex weekly production plan quicker and more efficient, as well as editing old code to significantly reduce programme running times and make the code cleaner.

Key achievements: learning VBA, writing clean code, working on other people's code, understanding factory processes.

SERVE LEGAL

Secret shopper | October 2013 – September 2016

With Serve Legal, I ensured that retail outlets were complying with sales legislation for young consumers regarding alcohol, tobacco and betting. I also gave the retailers feedback on the customer service I received, which has helped me understand the importance of implementing effective compliance and management control systems.

WAITROSE

Customer Services | October 2013 – March 2015

During my A-Levels, I had a part-time job working directly with the customers, where I learned the importance of customer service and time management, as well as having to think and act quickly when problems arose.

Other work experience includes waitressing with a Silver Service catering company, and bar work at Bath Rugby Club.

EDUCATION

DURHAM UNIVERSITY

University | October 2015- June 2018

BSc Maths, 2:2

During my first year, I studied joint honours Maths and Physics, transferring onto straight Maths at the beginning of my second year, enabling me to choose more interesting and specialised modules. In my third year, I focused on Applied Maths, as I enjoy the relevance to real situations, and gained a high first in my final year dissertation, for which I used Python to work around the problem I was exploring.

HAYESFIELD GIRLS' SCHOOL

Secondary school & sixth form | 2007-2015

A levels: A*AAB in Maths, Further Maths, Physics and Chemistry

GCSEs: 8A*s & 4As. At GSCE, I was awarded the April Payne prize for Mathematics for hard work and dedication to the subject, and the Oldfield Prize for Excellence in my overall GCSE results.

EXTRA CURRICULAR

- I am part of a level 5 cheerleading team based in Bristol. We will be competing at the World Championships in Florida in April.
- Throughout my three years at University, I represented Durham University in national competitions for cheerleading, gymnastics, and trampolining. I had executive roles for the cheerleading squad, including vice-captain, treasurer and uniform officer. I also ran the strength and conditioning training programme for the gymnastic and trampolining teams.
- I also have my Silver Duke of Edinburgh award, and RYA Level 3 sailing certificate.
